# Recruitment

One of the main applications of humanlogix is using the profiler as a pre-assessment in recruiting situations.

Unlike other pre-assessments humanlogix is not focussing on skills but on soft factors that are essential to decide whether a candidate will fit into a job profile or not.

Instead of inviting hundreds of candidates to job interviews to find out “how they will do the job” (attitudes, preferences and behavioural strategies) humanlogix does the work for you in four steps:

1. Define what you are looking for (ideal profile)
2. Let an unlimited number of candidates work on a valid work sample test
3. Match their individual results with the ideal profile
4. Select and know what you are getting

**Save time and money and let the candidates provide you with the necessary information which to choose.**

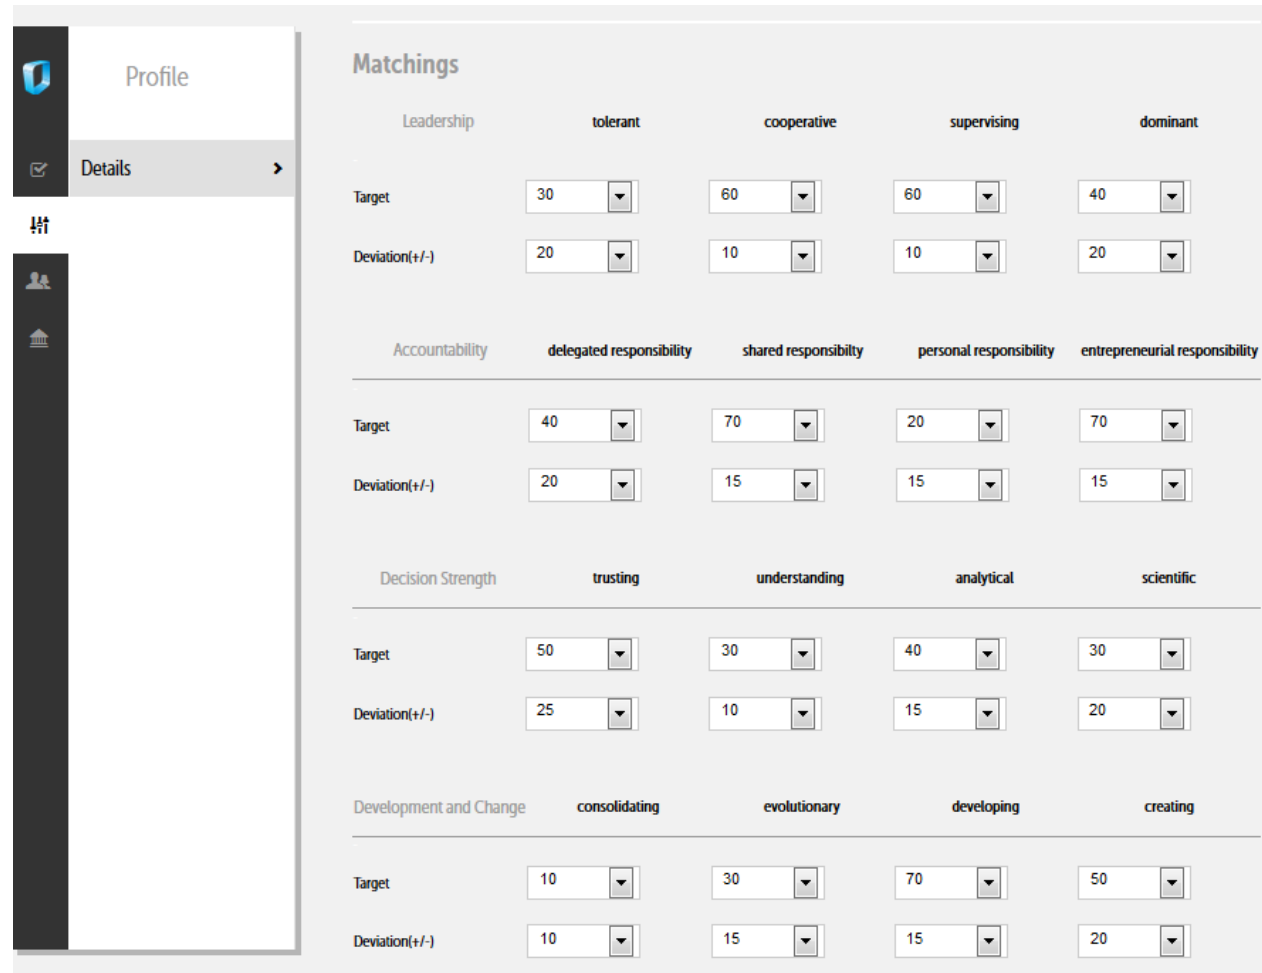

# Step 1: Define the ideal profile

Humanlogix profiler gives you a sophisticated tool at hand to define what behavioural traits and attitudes are needed for a certain job.

Design target values and deviations (tolerance) for 40 attributes.

Design your preferred job role

Leadership		tolerant	cooperative	supervising	dominant
Target	30	60	60	40	
Deviation(+/-)	20	10	10	20	
Accountability		delegated responsibility	shared responsibility	personal responsibility	entrepreneurial responsibility
Target	40	70	20	70	
Deviation(+/-)	20	15	15	15	
Decision Strength		trusting	understanding	analytical	scientific
Target	50	30	40	30	
Deviation(+/-)	25	10	15	20	
Development and Change		consolidating	evolutionary	developing	creating
Target	10	30	70	50	
Deviation(+/-)	10	15	15	20	

# Step 2: Assessment

Let all your candidates work on the job assessment –anywhere, anytime. Don't worry about numbers. You can give access to an unlimited number of candidates. This will save time and money.

Exciting real life cases let you draw candidates into situations that can occur tomorrow. Define the set of dimensions and the length of the test.

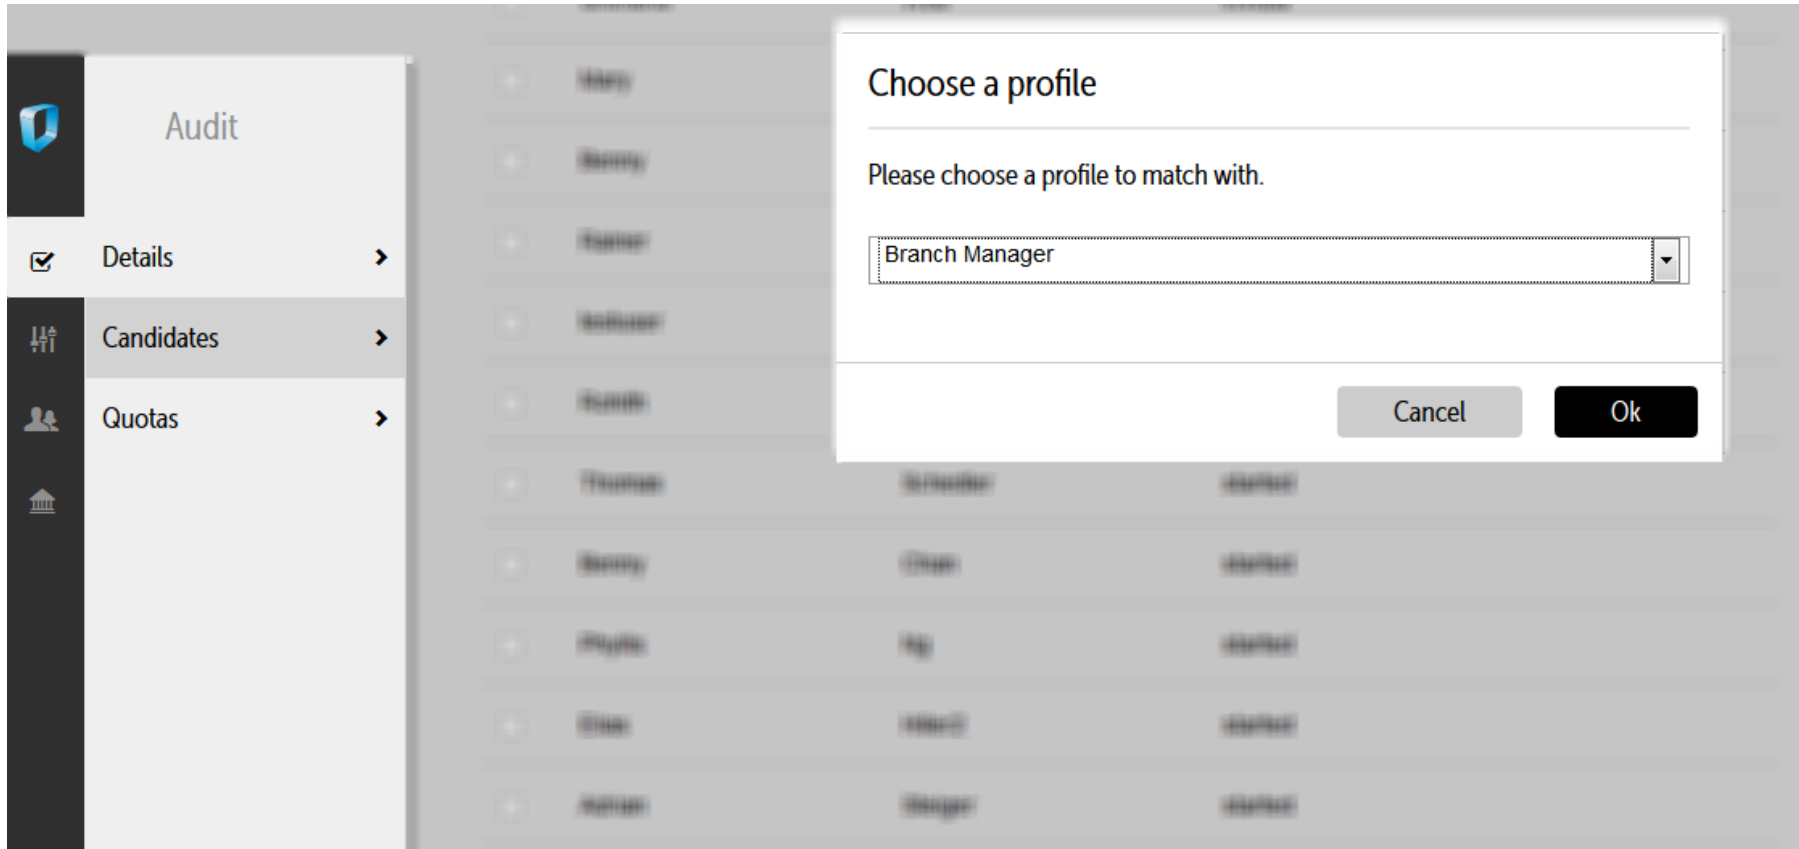

Save time and money

The screenshot displays a user interface for a job assessment. On the left, a task card is shown with a progress bar at the top right indicating a time of 1:20. The card content includes the date and time 'Friday, 18:00' and a paragraph: 'This is the end of your introduction program. Congratulations! Finally you are asked to report your learning and findings throughout the first week. How do you approach this last task?'. On the right, a feedback panel lists four 'Opinion' items. 'Opinion 1' is marked with a checkmark, 'Opinion 2' with a circle, 'Opinion 3' with an 'x', and 'Opinion 4' with a circle. Below the list, there are three buttons: a grey 'x' button, a blue circle button, and a grey checkmark button. A message below the buttons reads 'You have given this answer too often.'.

## Step 3: Matching

Define which candidate you want to match with which job profile.

The screenshot shows the Humanlogix interface. On the left is a navigation sidebar with 'Audit' at the top, followed by 'Details', 'Candidates', and 'Quotas'. The 'Candidates' section is active. The main area displays a list of candidates with columns for name, profile, and status. A modal dialog box titled 'Choose a profile' is open, prompting the user to 'Please choose a profile to match with.' The dropdown menu in the dialog is set to 'Branch Manager'. At the bottom of the dialog are 'Cancel' and 'Ok' buttons.

Name	Profile	Status
Henry	Branch Manager	Matched
Benny	Branch Manager	Matched
Thomas	Branch Manager	Matched
Benny	Branch Manager	Matched
Phyllis	Branch Manager	Matched
Ellen	Branch Manager	Matched
Anna	Branch Manager	Matched

Avoid annoying job interviews

# Step 3: Matching-Report 1

Dash board view on all behavioural attributes to learn which attributes fall below or exceed the predefined job requirements.

Paradigm shift from a deficit orientation to a matching orientation.

Sophisticated view on a person instead of building mean values that cannot describe a person in its complexity.

Best match instead of deficits

# Step 3: Matching-Report 2

## Matching

### Branch Manager

Get the statistics: Compare candidates according to their numbers of matching and variation coefficient.

Understand quickly in which attributes you will have to expect the biggest gaps compared to what you were looking for.

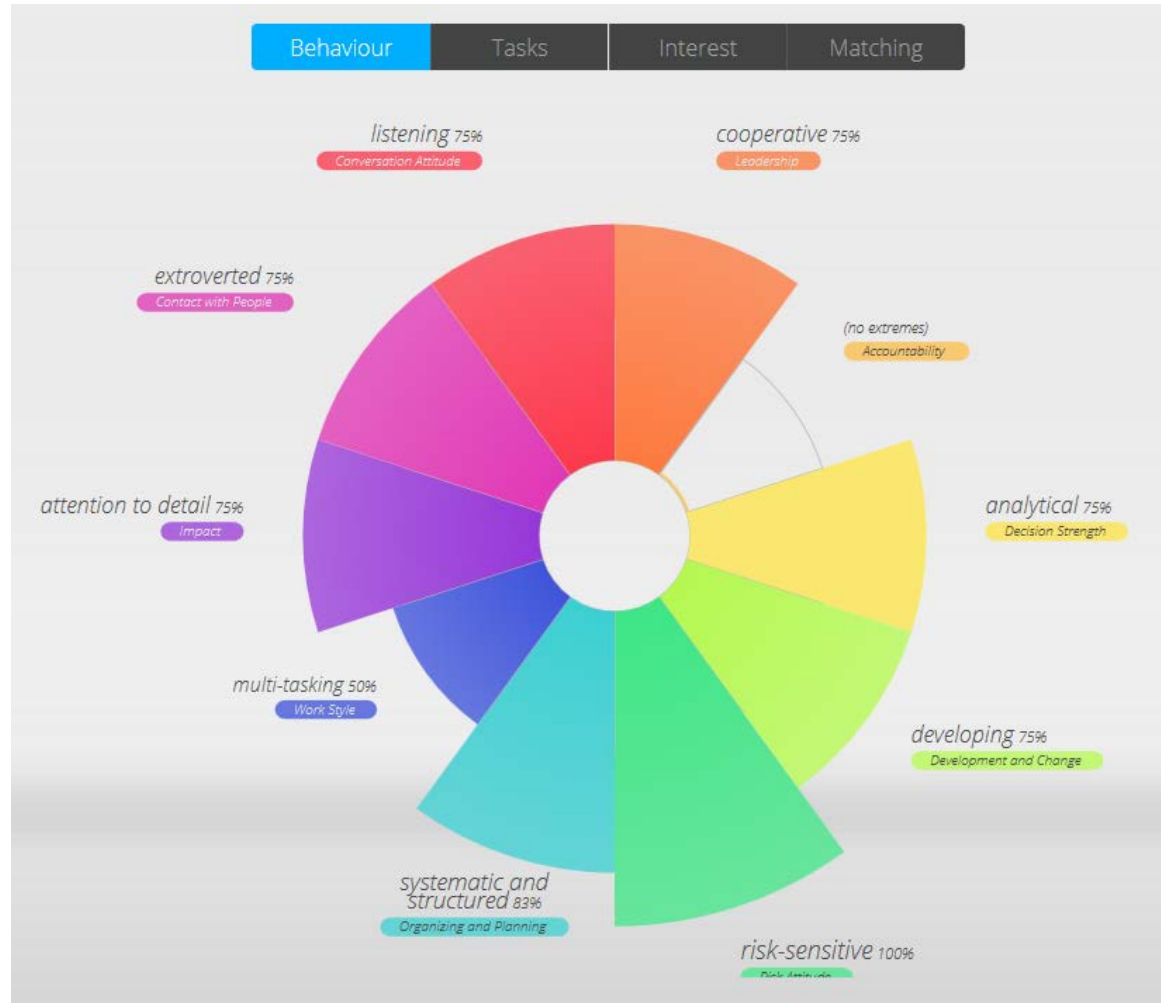

Dimension	Attribute	Tar.	Dev.	Res.	+/-	✓
Leadership	tolerant	30	20	<b>25</b>	5	✓
	cooperative	60	10	<b>75</b>	-15	
	supervising	60	10	<b>42</b>	18	
	dominant	40	20	<b>50</b>	-10	✓
Accountability	delegated responsibility	40	20	<b>50</b>	-10	✓

	risk-taking	20	10	<b>8</b>	12	
<b>Mean value</b>		<b>47</b>		<b>45.4</b>	<b>1.6</b>	
<b>Variation coefficient</b>					<b>21.9</b>	
<b>Number of matchings</b>						<b>17</b>
<b>Matchings in %</b>						<b>43</b>

Compare candidates and select best match

# Step 4: Select and understand what you are getting

Get a comprehensive overview of the most significant behavioural traits you can expect from your selected candidate.

Understand, what you are getting

# Step 4: Select and understand what you are getting

Understand inconsistent behaviour or attitudes due to different task requirements. Thus you are prepared to understand specific behaviour in specific situational settings.

	Analysis and Evaluation	Client contact	Decision, supervision and control	Development of resources and processes	Execution and Advice	Strategy, new products and new business
Leadership	cooperative	tolerant	supervising	cooperative	cooperative	dominant
Accountability	delegated responsibility	shared responsibility	entrepreneurial responsibility	delegated responsibility	personal responsibility	shared responsibility
Decision Strength	analytical	scientific	understanding	analytical	analytical	analytical
Development and Change	creating	consolidating	developing	creating	developing	developing
Risk Attitude	risk-sensitive	risk-sensitive	risk-sensitive	risk-sensitive	risk-sensitive	risk-sensitive
Organizing and Planning	systematic and structured	systematic and structured	systematic and structured	unconventional	systematic and structured	unconventional
Work Style	multi-tasking	focused	parallel	sequential	multi-tasking	sequential
Impact	attention to detail	attention to detail	attention to detail	go the extra mile	attention to detail	go the extra mile
Contact with People	extroverted	extroverted	reserved	team player	extroverted	team player
Conversation Attitude	inquiring	inquiring	listening	process oriented	listening	listening

# Step 4: Select and understand what you are getting

Understand individual preferences in combination with experience and qualifications
